This is a Request for Continued Examination (RCE) under 37 CFR 1.114 of the above-identified application.
Request for Continued Examination (RCE) practice under 37 CFR 1.114 does not apply to any utility or plant application filed prior to June 8, 1995, or to any design application. See Instruction Sheet for RCEs (not to be submitted to the USPTO) on page 2.

1. **Submission required under 37 CFR 1.114** Note: If the RCE is proper, any previously filed unentered amendments and amendments enclosed with the RCE will be entered in the order in which they were filed unless applicant instructs otherwise. If applicant does not wish to have any previously filed unentered amendment(s) entered, applicant must request non-entry of such amendment(s).

- a. ☐ Previously submitted. If a final Office action is outstanding, any amendments filed after the final Office action may be considered as a submission even if this box is not checked.
- i. ☐ Consider the arguments in the Appeal Brief or Rely Brief previously filed on _____
- ii. ☐ Other _____
- b. ☒ Enclosed
- i. ☒ Amendment/Reply
- iii. ☐ Information Disclosure Statement (IDS)
- ii. ☐ Affidavit(s)/ Declaration(s)
- iv. ☐ Other _____

2. Miscellaneous

- a. ☐ Suspension of action on the above-identified application is requested under 37 CFR 1.103(c) for a period of _____ months. (Period of suspension shall not exceed 3 months; Fee under 37 CFR 1.17(i) required)
- b. ☐ Other _____

3. Fees

- The RCE fee under 37 CFR 1.17(e) is required by 37 CFR 1.114 when the RCE is filed.
The Director is hereby authorized to charge the following fees, or credit any overpayments, to
a. ☒ Deposit Account No. 09-0435 (InterDigital Communications Corporation)

- i. ☒ RCE fee required under 37 CFR 1.17(e) \$ 790.00

- ii. ☐ Extension of time fee (37 CFR 1.136 and 1.17) \$ _____

- iii. ☐ Other _____

- b. ☐ Check in the amount of \$ _____ enclosed

- c. ☐ Payment by credit card (Form PTO-2038 enclosed)

Sir:

This Reply is being timely filed in response to the Final Office Action dated January 4, 2005. A Request for Continued Examination (RCE) is filed concurrently herewith.

Please amend the application without prejudice or disclaimer as follows:

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. - 16. (Canceled)

17. (Currently Amended) A wireless dual use user equipment (UE) capable of operating in a cordless and cellular environment, the dual [[user]] use user equipment comprising:

a modulation and demodulation device for modulating/demodulating data using a plurality of modulation/demodulation schemes, the plurality of modulation/demodulation schemes comprise a cordless scheme for communicating with a sub base and a cellular scheme for communicating with a base station;

a modulation and demodulation controller for switching the modulation/demodulation scheme of the modulation/demodulation device between the cordless scheme and the cellular scheme such that a transition between said cordless and cellular schemes is transparent to a user sending or receiving a communication signal from said dual use UE; the modulation and demodulation controller initiating operation in the cellular environment by sending a handoff

signal and switching to the cellular scheme; whereby a sub base in response to the sent handoff signal ceasing communications with a cellular base station.

18. - 20. (Canceled).

21. (Original) The dual use UE of claim 17 wherein the dual use UE determines it is leaving the cordless environment by measuring a received signal strength of a sub base transmission.

22. (New) The dual use UE of claim 21 wherein the modulation and demodulation controller switches to the cellular environment when said signal strength is below a predetermined threshold.

23. (New) The dual use UE of claim 17 wherein the dual use UE determines it is entering the cordless environment by detecting a sub base pilot signal.

24. (New) The dual use UE of claim 23 wherein the dual use UE, upon detecting the sub base pilot signal, sends a handoff signal to the sub base; whereby the sub base commences communicating to the cellular network and the dual use UE begins communicating with the sub base.

Applicant: J. Thomas O'Brien
Application No.: 09/981,386

REMARKS

After the foregoing Amendment, Claims 17 and 21 are currently pending in this application. New claims 22-24 have been added to more distinctly claim subject matter which the Applicant regards as the invention. Applicant submits that no new matter has been introduced into the application by these amendments.

Claim Rejections - 35 USC §103(a)

Claims 17 and 21 stand rejected under 35 U.S.C. §103(a) as being unpatentable over U.S. Patent No. 6,445,921 (Bell) in view of U.S. Patent No. 6,253,088 (Wenk).

In the present invention, the wireless dual use user equipment (UE) switches between the cordless scheme and the cellular scheme. To switch from the cordless scheme to the cellular scheme, a hand off signal is sent and the subbase in response to the hand off signal ceases communications with the cellular base station. At that point, the UE can seamlessly communicate using its own modulation device with the cellular base station. Accordingly, to the user of the dual use UE and the recipient of that user's call, the transition between the cordless and cellular environment is totally transparent.

Bell, on the other hand, does not teach a seamless transition. According to Bell, after detection of a failed link, i.e., a dropped call, a switch between cordless

Applicant: J. Thomas O'Brien
Application No.: 09/981,386

and cellular systems is initiated. This 'switch' requires a break in the communication signal and a re-call. To overcome this broken transition, the Examiner asserts the obviousness of replacing the subbase 150 of Bell with the subbase 18 of Wenk. Wenk, however, does not teach the in-call transition between cellular and cordless systems.

Rather, Wenk teaches a means for routing calls. The subbase of Wenk, sensing that the UE is within a predefined vicinity of the subbase, sends a message to the cellular network resulting in calls intended for the UE being routed to said subbase. Once the UE is no longer in the predefined vicinity, the subbase sends a 'de-registration' message to the cellular network informing the ACRE to cease forwarding calls to the subbase. As a result, any subsequent calls will be serviced through the cellular network.

Unlike the present invention, Wenk does not address the in-call transitioning of networks. Thus, if a user utilizing the system described in Wenk began a call serviced by the subbase (cordless network), and during that call moved beyond the vicinity of the subbase, such call would be dropped. Accordingly, it is respectfully submitted that Bell-Wenk system would not disclose the transparent environment of the present invention. In response to the Examiner's remarks, however, claim 17 was amended and claims 22-24 were added to further distinguish the claim subject matter which the Applicant regards as the invention from the cited art.

Application No.: 09/981,386

Conclusion

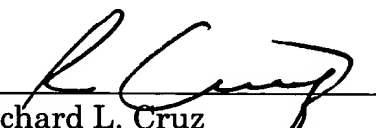

If the Examiner believes that any additional minor formal matters need to be addressed in order to place this application in condition for allowance, or that a telephone interview will help to materially advance the prosecution of this application, the Examiner is invited to contact the undersigned by telephone at the Examiner's convenience.

In view of the foregoing amendments and remarks, Applicants respectfully submit that the present application, including claims 17 and 21 - 24, is in condition for allowance and a notice to that effect is respectfully requested.

Respectfully submitted,

J. Thomas O'Brien
